

SHANIF P

Python Full-Stack Developer | Python Developer | Backend Developer

Malappuram, Kerala, India | +91 8921558592 | shaniiiiif@gmail.com | GitHub: github.com/shaniiiiif

PROFESSIONAL SUMMARY

Python-focused developer building practical web applications, backend services, APIs, data tools, and developer utilities. Hands-on experience with Python, Django, Flask, FastAPI, RESTful API development, SQL databases, Git/GitHub, testing, data processing, and local-first application design. Strong foundation in object-oriented programming, exception handling, modular architecture, database integration, CLI development, and problem solving. Seeking junior Python Developer, Backend Developer, or Python Full-Stack Developer opportunities.

TECHNICAL SKILLS

Programming: Python, SQL, Object-Oriented Programming (OOP), Exception Handling, Modules, Inheritance, Operator Overloading

Web & Backend: Django, Flask, FastAPI, REST APIs, RESTful Services, Backend Development, API Development, Web Application Development

Databases: PostgreSQL, MySQL, SQLite, SQLAlchemy, Database Integration, Relational Databases, CRUD Operations

Data & Libraries: Pandas, NumPy, Polars, Requests, OpenPyXL, BeautifulSoup, Data Cleaning, Data Processing, JSON, CSV

Tools & Platforms: Git, GitHub, Linux, Termux, CLI Development, Pytest, python-dotenv, Virtual Environments, Package Management

Security & Reporting: Defensive Security, Authorized Security Auditing, Local Analysis, Structured Reporting, JSON, HTML, CSV, SARIF, JUnit XML

PROJECT EXPERIENCE

DataVortex - Offline Data Analytics Tool

Technologies: Python, Pandas, Polars, SQL, SQLite, MySQL, PostgreSQL

- Built a Python-based, privacy-focused analytics application designed for local/offline data analysis without requiring an external API key.
- Worked with CSV, Excel, Parquet, SQLite, MySQL, and PostgreSQL workflows, including data cleaning, transformation, and analysis tasks.
- Applied Pandas and Polars for practical data-processing workflows and designed the project for developer-friendly command-line usage.

Kuttikada - E-Commerce Web Application

Technologies: Python, Web Application Development, Database Concepts, Git, GitHub

- Developed an e-commerce web application concept covering product discovery, categories, order/account flows, and customer-support structure.
- Focused on practical application architecture, user flow, maintainability, and integration of Python-based web development concepts.

CyberShield X v23.0.0 - Defensive Cybersecurity Toolkit

Technologies: Python 3.10+, CLI, Testing, Defensive Security, JSON/HTML/CSV/SARIF/JUnit XML

- Built a pure-Python defensive security toolkit for authorized auditing and local analysis using a standard-library-only runtime architecture.
- Implemented SAFE, BALANCED, DEEP, CI, and NINJA operating profiles with CLI workflows and 50+ self-tests.
- Designed structured reporting in JSON, HTML, CSV, SARIF, and JUnit XML formats for analysis and development workflows.

CERTIFICATION

Python Essentials 2 - Cisco Networking Academy | August 2026

Skills: Python Programming, Object-Oriented Programming (OOP), Exception Handling, Modules, Inheritance, Python Development Fundamentals

CORE COMPETENCIES

Python Development | Backend Development | Full-Stack Development | REST API Development | Database Integration | SQL | OOP | CRUD Applications | API Design | Data Processing | CLI Applications | Testing | Git/GitHub | Problem Solving | Debugging | Local-First Software

TARGET ROLES

Python Developer | Python Full-Stack Developer | Backend Developer | Junior Backend Developer | Junior Full-Stack Developer | Django Developer | Flask Developer | FastAPI Developer

TECHNICAL PROFILE

Available for entry-level and junior software development opportunities focused on Python, backend engineering, web development, API development, databases, and practical application development.
